

The Govi Gnana Service
a unique ICT for development initiative
to fight agricultural poverty
in Sri Lanka

Harsha de Silva
e-development labs and LIRNEasia

CTO Forum: ICT for Business and Development

20-21, September 2004
Colombo, Sri Lanka

Context

- Govi Gnana Service is an e-Sri Lanka pilot project of the ICTA Agency.
 - Conceptualized, designed, developed and implemented by e-development labs with technology by Interblocks.

Presentation structure

- Background to problem
- GGS as a possible solution
- The GGS pilot
- Lessons
- Way forward

Poverty and agriculture

- In Sri Lanka, vast majority of all poor households depend on agriculture for their livelihood.
 - Failed government policy
 - Lack of market participation

Can it be helped?

- Irrigation, import policy, seed, fertilizer, R&D, extension services are all contributing...
 - Individual farmer *cannot* influence
 - Government to initiate change
- But, crop planning, produce marketing, and credit is critical
 - Individual farmer *can* change situation
 - Need tools

Where does ICT fit in?

- Bridge information asymmetry in
 - Crop planning
 - Poor analysis of expected demand and supply
 - Little knowledge of possible forward contracts
 - Produce marketing
 - Little knowledge of spot prices and buyers
 - Extension services
 - Hardly any advise from extension officers: weather, fertilizer, disease prevention etc.
 - Agriculture credit facilitation
 - No platform for FSC scheme [including crop loans to farmers from banks by collateralizing contract]

GGGS

- An ICT intervention to increase farmer income by
 - improving crop planning, and
 - increasing marketing efficiency
 - also helping credit facilitation through FSC

GGs pilot at DDEZ

Key strengths

- [Perfect location](#)
- Largest wholesale market
 - 143 Traders
 - 30 - 40m/day
 - > 500 trucks/day
- Successful
 - Private enterprise
 - Commission system
- Catalyst
 - FSC

Key weaknesses

- Information asymmetry
 - No price display
 - Farmers unaware of best price to sell
 - Traders have network
 - Commission system
- Result → farmers do not get best spot price
 - No platform for FSC information exchange

[Back](#)

GGG pilot objectives

If produce already brought to DDEZ market

→ Help farmer get best possible price

If produce harvested, but not brought to DDEZ

→ Help farmer decide whether to bring to DDEZ or not

If produce just about to be harvested

→ Help farmer decide whether to harvest today or tomorrow or day after

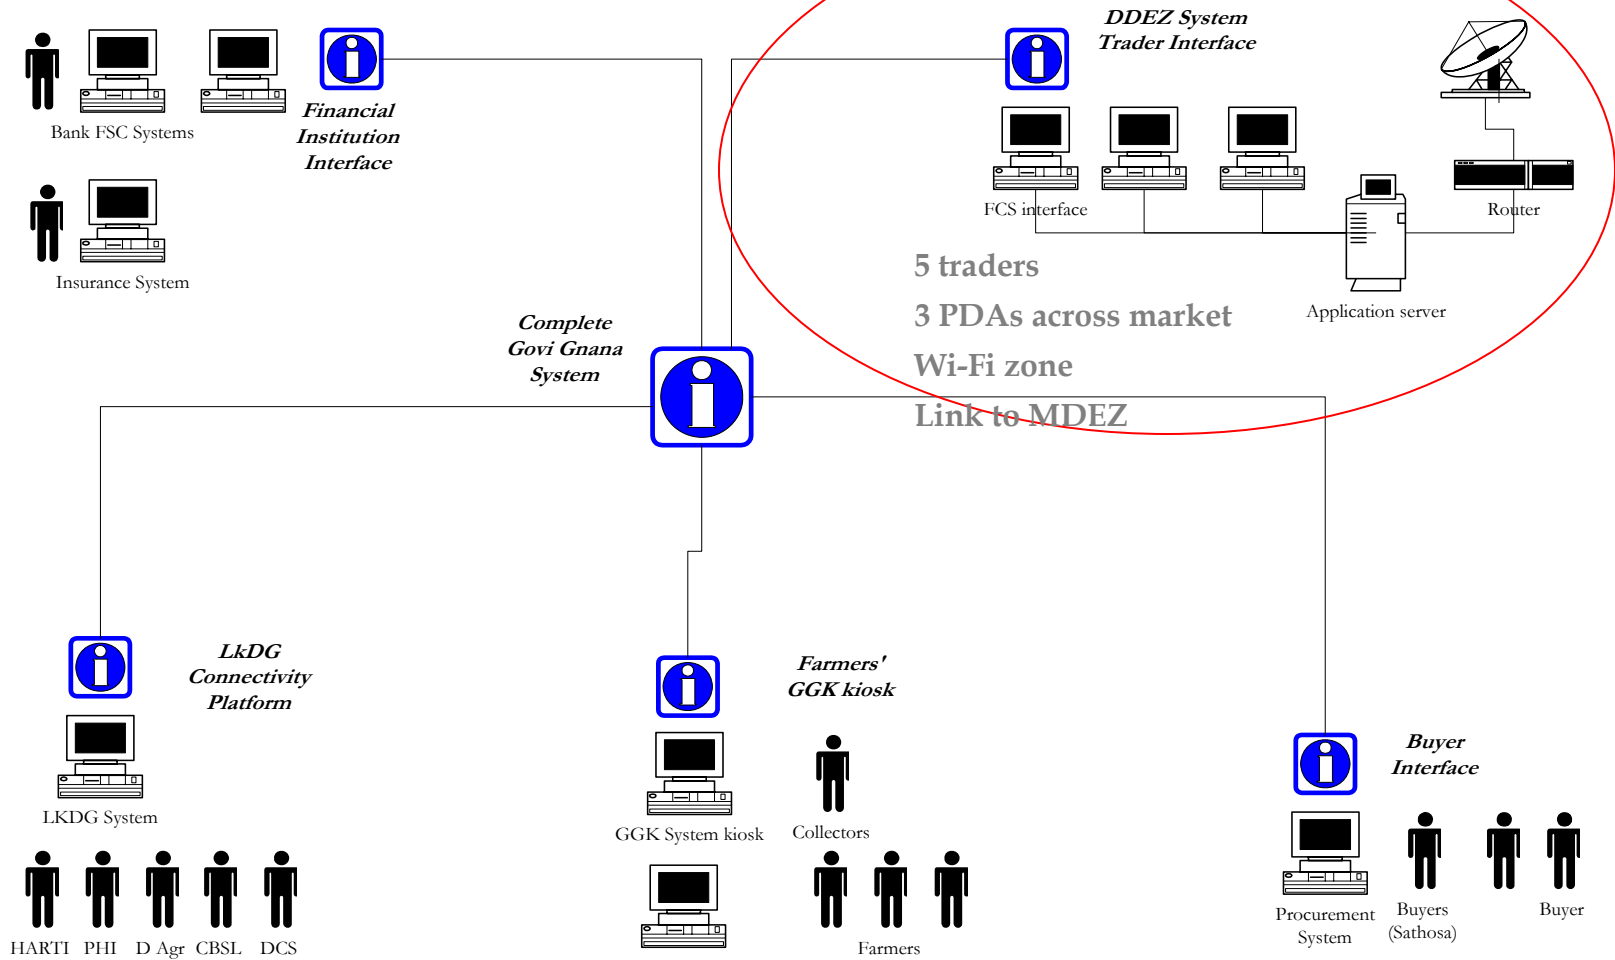

If not planted, or many days to harvest

→ Help farmer enter into FSC

Then: Information darkness

The GGS info-structure: DDEZ

Now: Help get best price

තොරතුරු හා සන්නිවේදන තාක්ෂණය භාවිතයෙන් කෘෂිකාර්මික අංශවිකරණයේ කාර්යක්ෂමතාවය වර්ධනය කිරීම මගින් ගොවි මහතා වෙත ස්ථාවර හා ඉහළ ආදායමක් ලබාදීමේ ක්‍රියාමාර්ගය මුලික වශයෙන් ගොවි දැනුම ව්‍යාපාරිකයයි.

මෙම ව්‍යාපාරිකයේ පළමු අදියර ශ්‍රී ලංකා තොරතුරු, සන්නිවේදන හා තාක්ෂණික ආයතනය, භාෂිත කටයුතු සම්බන්ධ අමාත්‍යාංශය සහ ශ්‍රී ලංකා මහ බැංකුව සමඟ එක්ව දැනුම හා මානව වාසන ආර්ථික මධ්‍යස්ථාන ප්‍රමුඛ කොටසෙන් සියලු ව්‍යාපාරිකයන් ලෙස ක්‍රියාත්මක වේ.

Welcome to GGS, an ICT solution to help farmers and traders improve efficiency in agriculture marketing. The first phase of GGS is now being implemented at the Dambulla and Meegoda Dedicated Economic Zones under the pilot project programme of the ICT Agency. GGS is also supported by Ministry of Rural Economy and the Central Bank of Sri Lanka.

දැන් පවතින මිල Spot price

for example

GGS was conceptualised and now being designed by e-development labs. Interblocks is responsible for developing the software slotution while PricewaterhouseCoopers Lanka is managing the pilot project implementation. The pilot is funded by ICTA with World Bank support.

FSC platform

- Govi Sahanaya programme
 - FSC introduced by CBSL in 1999
 - Certainty
 - Growing rapidly last year and a half
 - 71,000 FSC so far → but, less than 8% of 2003 paddy crop
- Problem is dissemination platform
- Solution is GGS: FSC platform, just implemented

Objective...

Lessons

- Huge difference between e-concepts and implementing even a simple ICT 4 Development initiative
 - Farmers are not e-people
 - “boru kathaa”
- Flexibility
 - From failed attempt → to projector on a rope
- Need long-term commitment
 - Learning curve is almost flat
 - Changing curve since June-July
 - story 1: check the price...
 - story 2: chilies!
 - Cannot expect overnight benefits
 - Story 1: Care
 - Story 2: working on EGB

Not interested...

Tell me more...

[Back](#)

Way forward

- Pilot: *No revenue model*
 - Run until early 2005 → ready to scale up
 - Establish outlet at Jaffna
 - Location identified, Tamil translation → October 2004
- Scale up: *Transaction and subscription based revenue model*
 - Connect all 143 stalls
 - Connect all Economic Zones and markets
 - FSC → Wholesale buyers and Farm organizations
[transaction based revenue]
 - Primary VGK service *[subscription based revenue]*
 - Personalized small agri-business office
 - negotiate FSCs, export orders...
 - Local information: crops, weather, fertilizer, purchasing...
 - DoA cyber extension point
