

September 2007, revised

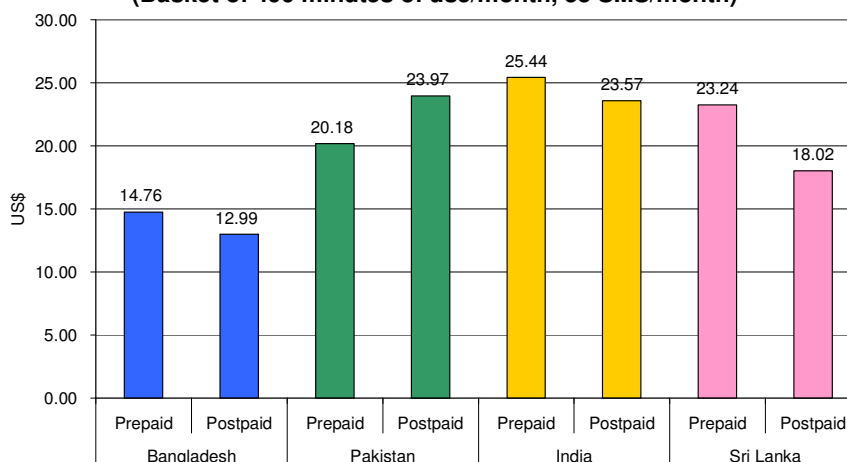

Average monthly mobile cost for a Low User
(Basket of 89 minutes of use/month, 20 SMS/month)

Average monthly mobile cost for a Medium User
(Basket of 231 minutes of use/month, 30 SMS/month)

Average monthly mobile cost for a High User
(Basket of 499 minutes of use/month, 33 SMS/month)

Notes

Price basket calculation is based on OECD methodology. Details of methodology available at http://www.teligen.com/t_basket.asp
Baskets were based on data from Bangladesh (July 2007), Pakistan (June 2007), India and Sri Lanka (March 2007).

OECD call distributions by duration, destination, and time of day were used since relevant data for each of the four countries was not available publicly.

The most popular/cheapest tariff plans of the largest operator were covered for each country, based on subscriber numbers.
