

LIRNEasia @ five:
research --> policy --> knowledge-based economies

Speaker bio: Glenda Kruss, PhD

Kruss, Glenda, PhD, is a chief research specialist in the Education, Science and Skills Development research programme, at the Human Science Research Council (HSRC), South Africa. She was previously an associate professor in the Faculty of Education at the University of the Western Cape, South Africa.

Her research over the past five years at the HSRC has focused on higher education, exploring the nature of private provision, the issue of responsiveness to economic and social needs, and the contribution to human resources development strategies. This new research path led to a focus on higher education in relation to the national science and technology system, research and innovation policy, and national and regional development, with a specific focus on higher education-industry linkages.

Her publications include two books, *Financial or Intellectual Imperatives: Working partnerships in higher education, industry and innovation*, and *Chasing Credentials or Mobility: Private Higher Education in South Africa*. She has recently completed a study of university-industry linkages in sub-Saharan Africa, comparing conditions in South Africa, Uganda and Nigeria and is extending her work to consider university interaction with social partners other than firms, particularly in low-income contexts.
