Hourly loading of base stations reveals distinct patterns

 We can use this insight to group base stations into different groups, using unsupervised machine learning techniques

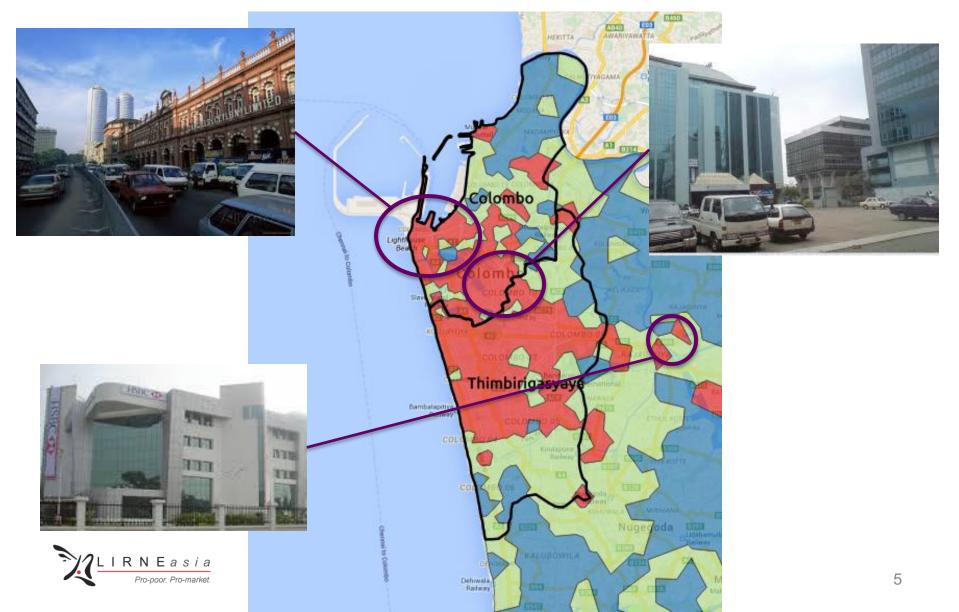

Three spatial clusters in Colombo District

- Cluster-1 exhibits patterns consistent with commercial area
- Cluster-3 exhibits patterns consistent with residential area
- Cluster-2 exhibits patterns more consistent with mixed-use

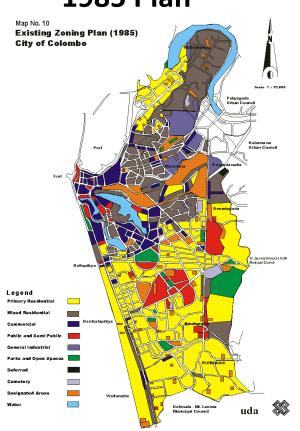

Our results show Central Business District (CBD) in Colombo city has expanded

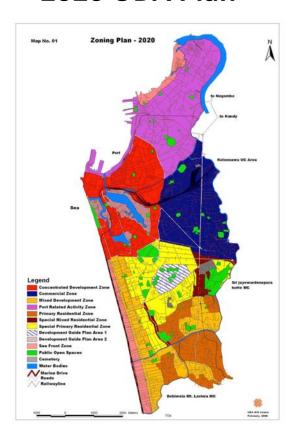

Plans & reality

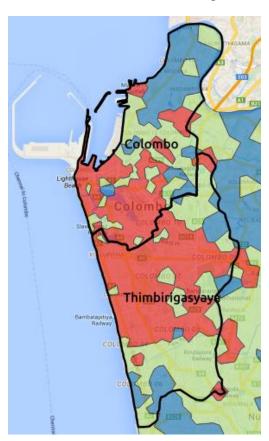

1985 Plan

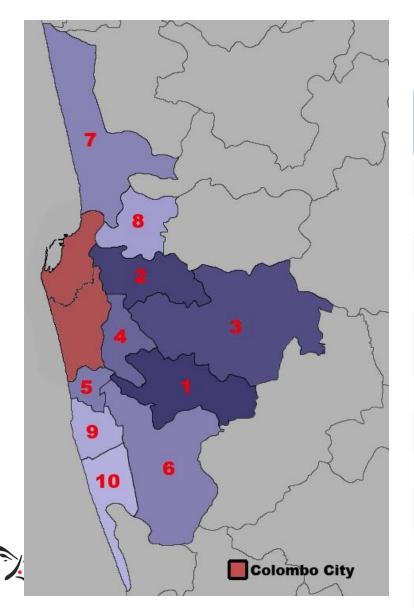

2020 UDA Plan

2013 reality

46.9% of **Colombo City's** daytime population comes from surrounding DSDs, but some surprises . . .

Colombo city is made up of Colombo and Thimbirigasyaya DSDs

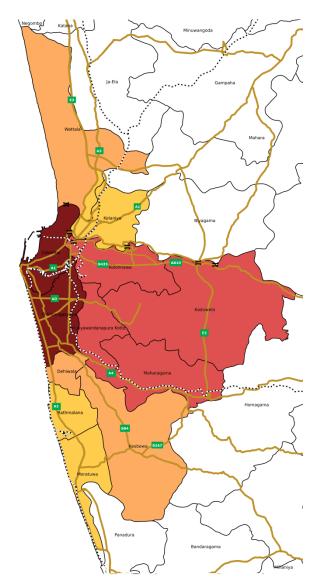

Home DSD		%age of Colombo's daytime population
Colombo city		53.1
1.	Maharagama	3.7
2.	Kolonnawa	3.5
3.	Kaduwela	3.3
4.	Sri Jayawardanapura Kotte	2.9
5.	Dehiwala	2.6
6.	Kesbewa	2.5
7.	Wattala	2.5
8.	Kelaniya	2.1
9.	Ratmalana	2.0
10	. Moratuwa	1.8

Do the current LG boundaries make sense?

- Commuters cause costs which are not reflected in city revenues
- Fragmented governance makes coherent planning for transport, flood control, solid waste management, etc. difficult
