13	Shan/Chin	Hearing	C	4	2	2	2
14		Mobility	D/E	3	3	2	2
15		Visual	D/E	3	3	2	2

#### Notes

1. The parameters for defining SECs employed by the Client for previous research are as follows. If a different classification method is to be used by the Consultant, please indicate this in the Technical Proposal

Monthly household income in MMK	SEC
100,000 or below	E
100,001 - 200,000	D
200,001 - 300,000	
300,001 - 400,000	C
400,001 - 500,000	
500,001 - 600,000	B
600,001 - 700,000	
700,001 - 800,000	
800,001 - 900,000	
900,001 - 1,000,000	
over 1,000,000	A

2. If more than one SEC is listed for a specific FGD, the respondents should be equally distributed among the groups. Eg: SEC A/B would require 3 respondents from SEC A and 3 respondents from SEC B.

3. For all those with visual impairments, please note that at least one respondent who is employed should be in a vocation other than being a blind masseuse. The recruitment criteria is based on the comments about the blind only being able to find jobs as blind masseuses found in <https://www.mmmtimes.com/national-news/yangon/26187-employers-urged-to-give-jobs-to-the-blind.html>
