

Position: Policy and Legal Researcher

What we offer

- Competitive remuneration
- Stimulating work environment
- International exposure on regional projects with potential foreign travel

Job duties and responsibilities

- Undertake legal and policy research (secondary and primary) primarily at the intersection of technology, economics, and infrastructure
- Synthesise findings (oral and written formats) and structure appropriately to summarise key points, recommendations, conclusions etc.
- Summarise other documents in oral and written presentations as required
- Manage research projects from end to end ensuring high quality outputs.
- Provide intellectual input toward the research alongside senior researchers.
- Assist in proposal writing and business development activities
- Organise and manage international events and training programs

Skills, qualifications, and experience

- Min 1 year of experience in comparative legal and policy research
- Strong written and verbal communication skills in English
- Able to produce excellent, well structured, clear, and concise written work
- Excellent communication skills across geographical locations
- Experience working with diverse and/or remote teams
- Minimum 2.1 or a GPA of 3.6 in Law in any jurisdiction

Behaviours and Competencies

- Keen to learn, develop and self-motivated
- Excellent attention to detail
- Be effective independently, as well as within a team.
- Comfortable with ambiguity: able to find solutions, without precise instruction on how to get there
- Ability to undertake a wide range and variety of tasks with conflicting deadlines and manage changing priorities

- Use LinkedIn easy apply OR
- Email hr@lirneasia.net
- SUBJECT: Policy and Legal Researcher
- Detailed CV (max four pages) with contact details of two non-related references

What we do

LIRNEasia is a pro-poor, pro-market think tank based in Sri Lanka and active across emerging Asia-Pacific. We conduct in-depth, policy-relevant research on infrastructure industries including the ICT sector. Our work often extends to other areas such as employment, education, agriculture, and disability. We collect robust data and document regional good practices. We then disseminate independent, actionable knowledge, to policy makers, regulators, service providers and the media, with the view of benefitting the poorest citizens in Asia.
