What we do

LIRNEasia (www.lirneasia.net) is a pro-poor, pro-market think tank based in Sri Lanka and active across emerging Asia-Pacific. We conduct in-depth, policy-relevant research on infrastructure industries including the digital sector. Our work often extends to other areas such as employment, social safety nets, electricity, and disability among others. We collect robust data and document regional good practices. We then disseminate independent, actionable knowledge, to policy makers, regulators, service providers and the media, with the view of benefitting the poorest citizens in Asia.
