Job Title: Statistician and Research Manager

Join LIRNEasia, a dynamic and internationally recognized Think Tank, as a Statistician and Research Manager.

What we offer:

Competitive remuneration, international exposure on regional projects with potential foreign travel, a supportive work environment, the opportunity to learn new skills and develop your own brand.

In this role, you will:

- Manage multi-country surveys, including design (sampling), implementation, and quality checks during fieldwork
- Lead statistical analysis and modeling using SPSS, STATA, and R
- Manage external relationships with market research companies, handle procurement and proposal evaluation
- Represent LIRNEasia at international and regional meetings and conferences
- Produce presentations, infographics, research reports, and research papers to disseminate research findings to external stakeholders such as policymakers, regulators, industry representatives, civil society, media, and academia.
- Propose your own unique ideas and methods for future work

What you'll need:

- A Bachelor's degree in Statistics or Econometrics with a minimum 2.2 or GPA of 3.0. Masters in Statistics is desirable
- Minimum 8 years of relevant work experience
- Proficiency in Microsoft Office and statistical packages such as STATA, SPSS, or R
- Strong written and verbal communication skills
- Fluency in English. Proficiency in another language will be an advantage

To apply:

- Email hr@lirneasia.net on or before 28th February 2023
- SUBJECT: Statistician and Research Manager
- Detailed CV (no more than four pages)

What we do

LIRNEasia (www.lirneasia.net) is a pro-poor, pro-market think tank based in Sri Lanka and active across Asia-Pacific. We conduct in-depth, policy-relevant research on infrastructure industries including the digital sector. Our work extends to areas such as labour, social safety nets, electricity, and disability among others. We collect robust data and document regional good practices.

Our research findings are used to engage actively in the policymaking process and to provide independent, actionable knowledge to key stakeholders, including policymakers, regulators, service providers, media professionals, and academia. Ultimately, our goal is to ensure that our research benefits the poorest citizens in Asia by promoting evidence-based policies.
